André Martins

💼 Software Developer 📍 Porto, Portugal (Working Remotely)

I turn ideas into real-life web products as a developer advocate. Skilled in software development, I focus on architecting solutions that meet business needs and exceed user expectations. With a commitment to producing high-quality, reliable code that adheres to industry standards and principles, I excel at collaborating with teams to overcome challenges and drive project completion.

Work History

Trainline - Software Developer

Jan 22 - Present | London, UK (Remote)

- As part of a team focused on driving user growth for Trainline through SEO initiatives, I collaborate closely with the SEO team to develop and implement effective strategies for increasing traffic and engagement, while also developing solutions mainly using Node.js, JavaScript, TypeScript, React, and SASS that are optimized for search engines and provide an outstanding user experience for Trainline's customers.
- Collaborated with a team to enhance the company's tech estate and development experience by implementing tech advancements, removing tech debt, and making architectural improvements for efficient, high-quality development processes.

Mindera - Software Developer

Jan 22 - Present | Porto, Portugal (Hybrid)

- Collaborating closely with a team of professionals from both my company and the client company to deliver excellent results on time and within budget.

Blip - Frontend Developer Intern

Mar 21 - Jul 21 | Porto, Portugal (Remote)

- I utilized cutting-edge technologies, including Javascript, Typescript, RxJS, and SASS, to implement a new feature in a client application that boosted user engagement through gamification techniques. To ensure quality and reduce potential issues, I also enforced comprehensive testing for the feature using Jest and Enzyme for unit tests, as well as Cucumber and Selenium for functional tests.
- Collaborated closely with a team of software developers and utilized SCRUM methodology daily, including daily stand-ups, sprint planning and retrospective, to ensure project delivery on time and to a high standard.
